

# RIDGE VENT R-SERIES

## Overview

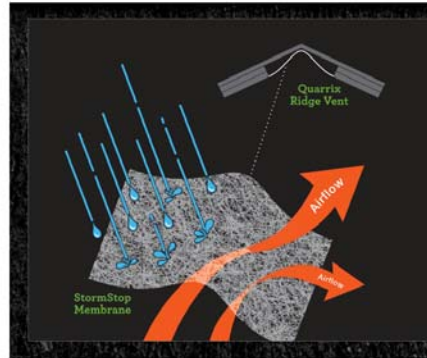

Quarrix Ridge Vents are the most tested and certified on the market. By allowing hot, moist air to release at the highest point of the attic, they help keep every attic cool and are essential to achieving a balanced ventilation system. Protection is important on every roof. The patented StormStop® Membrane allows air to flow while preventing all forms of weather from entering the attic space.

### Quarrix Ridge Vent R-Series Benefits:

- Designed for install on Hip and Ridge
- Most tested and certified vent on the market (see p. 35 for details)
- Tested to perform in all forms of weather and climates—rain, snow, dust, extreme hot and cold
- Gun-nailable with highly rigid design
- One-Pass™ Installation installs cap and vent at the same time
- Trim to any length with utility knife
- Virtually invisible with low profile and shingle-over install

See install on page 16

R-Series	Length	Width	Height
R70	20' Roll	7"	5/8"
R90	20' Roll	9"	5/8"
R110	20' Roll	11 1/4"	5/8"

### StormStop® Membrane

StormStop Membrane protects the attic from nature's worst elements. In extreme weather conditions, damaging elements are blocked by the StormStop Membrane, which can be found in Quarrix Ridge Vent, R and S Series, and Multi-Use Vent. StormStop Membrane is a revolutionary spun-bound material that keeps moisture out while allowing continuous airflow. The material is engineered so that moisture simply beads up and runs off to protect the attic space.

Quarrix Ridge Vent Patents: 5,651,734; 5,934,965; 5,947,817; 6,450,882; 6,623,354; 6,913,530

### Ridge Vent R-Series Specs

Length	20' Roll
Widths Available	7", 9" and 11 1/4"
Height	(Low) Profile
Certified N.F.A.	12.7"
Pitches	3/12 to 20/12
Warranty	Lifetime Manufacturer*
Material	HDPE Plastic
Part Number	7" - #58786 9" - #58785 11 1/4" - #58784 11 1/4" with coil nails - #39914

See page 34 for metric measurements.  
\*See page 36 for complete warranty.

### APPLICATIONS

	Recommended Product Width
Asphalt Shingle	7", 9" and 11 1/4"
Flat Tile	9"
Cedar Shake	7" or 9"
Stone-Coated Steel	7"
Standing Seam Metal	7", 9" or Metal
Hip Roofs	11 1/4"
